

# make a *Splash* WITH summer savings

A few small adjustments around the house can help you keep your cool and keep your electric bills under control when the heat is on.

1

## AIR DRY

Hang washed clothes outdoors, and let dishes dry on the drying rack.

2

## BARBECUE MORE

Fire up the grill outside to spare your home from heat created in the kitchen.

3

## GIVE YOUR A/C A BREAK

Set your thermostat between 76° and 78° when you are home.

4

## INCREASE AIR FLOW

With a fan, you'll be able to raise your thermostat four degrees and still stay comfortable. Turn fans off when you leave the room.

5

## CHANGE YOUR FILTER

Clean or replace your HVAC filter regularly during the cooling season to improve efficiency.

6

## SHUT THE BLINDS

Keep your curtains closed on the sunny side of your home to block out the heat.
