

# HOW NES PROVIDES POWER

*to your home*

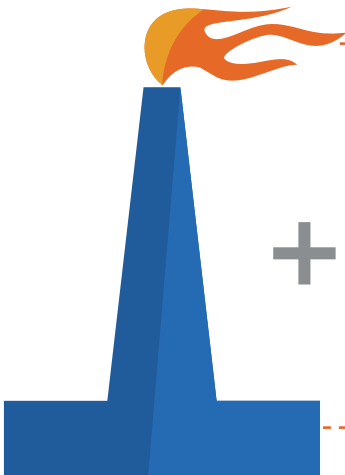

Over 370,000  
NES customers

## ELECTRICITY IS GENERATED

by the Tennessee Valley Authority (TVA).

TVA produces power from  
**HYDROELECTRIC DAMS,  
COAL-FIRED AND NUCLEAR PLANTS**  
and renewable energy sources.

When energy demand is high, TVA uses  
**GAS-FIRED GENERATION**  
and buys additional power when needed.

*These more expensive sources contribute to higher rates in the summer and winter.*

**100% OF NES' ELECTRICITY**  
is purchased from TVA.

*It's NES' role to deliver that power to your home.*
